

IILM UNIVERSITY, GREATER NOIDA

AN INTERNSHIP REPORT

Web Development

InAmigos Foundation

Submitted to the School of Computer Science and Engineering, IILM University, Greater Noida, U.P.
in partial fulfilment of the requirement for the degree of B.Tech (Computer Science and Engineering)

Ashutosh Ray

Roll No. 25SCS1003004143 | Batch 2025–2029 | Internship: 29 Aug. - 14 Sep. 2026

Ashutosh Ray

B.Tech — Computer Science & Engineering

ABOUT THE CANDIDATE

Internship Profile

ROLL NUMBER

25SCS1003004143

INSTITUTE

IILM University, Greater Noida, U.P.

PROGRAMME

B.Tech CSE, Batch 2025–2029

INTERNSHIP ROLE

Intern — Web Development

DURATION

29 August - 14 September, 2026 (Remote / Project-Based)

Internship at a Glance

Role, context and focus areas

ROLE

Web Developer

Flexible / primarily
remote

ORGANIZATION

InAmigos Foundation

NGO / foundation
context

DURATION

29 Aug – 14 Sep 2026

WORKFLOW

AI + No-code

UI/UX + Figma

Primary focus

AI-assisted website creation • website improvement analysis • user-experience thinking • NGO feature planning

Objectives

What the internship tasks were designed to develop

AI & No-code

01

Use AI/no-code tools to create a professional web presence.

UI/UX Analysis

02

Evaluate design, content, layout, usability and accessibility.

NGO Features

03

Identify features that improve donation, volunteering and engagement.

Professional Content

04

Create concise, readable and professional website content.

User-Centered Thinking

05

Understand how design choices influence visitor actions.

Work Completed

Three core tasks formed a progressive learning workflow

TASK 2	AI-Based Personal Profile Website	Build a professional student profile using an AI/no-code website builder.
TASK 3	Foundation Website Improvement Analysis	Audit the InAmigos website and turn observations into practical UI/UX recommendations.
TASK 4	NGO Website Feature Highlight	Create a Figma-style feature showcase for donation, volunteer, impact and engagement.

Task 2 — AI-Based Personal Profile Website

Professional online presence for a B.Tech CSE student

CONTENT

- Introduction & tagline
- Education
- Skills
- Projects / achievements
- Contact & social links

Suggested tagline:
“Learning. Building. Creating
with Technology.”

STRUCTURE

Home / Hero
About / Education
Skills
Projects
Contact
Footer

Clear primary CTAs:
“View My Projects”
“Contact Me”

AI ASSISTANCE

- Professional bio
- Tagline & CTA ideas
- Section headings
- Project descriptions
- Page hierarchy
- Grammar & tone refinement

AI acts as a design assistant;
human review remains
essential.

Task 3 — Foundation Website Analysis

What was observed in the supplied InAmigos Foundation screenshots

✓ **OBSERVATION**

Clear NGO-oriented visual identity

✓ **OBSERVATION**

Highly visible Donate Now action

✓ **OBSERVATION**

Prominent donation & volunteer actions

✓ **OBSERVATION**

Campaign progress bars

✓ **OBSERVATION**

Simple top navigation

✓ **OBSERVATION**

Mission-focused hero section

✓ **OBSERVATION**

Impact statistics for quick scanning

✓ **OBSERVATION**

Testimonials for social proof

Task 3 — Visual Evidence

Supplied website screenshot used for the improvement analysis

Figure 14.1: Home/hero section supplied for analysis.

Task 3 — Key Improvement Recommendations

From visual observation to actionable design changes

TRUST

Add credibility signals, impact-report sources and clearer campaign status.

ACCESSIBILITY

Alt text, keyboard focus, sufficient contrast and accessible form labels.

MOBILE UX

Stack cards cleanly; keep buttons easy to tap; verify collapsed navigation.

CONTENT

Consistent campaign fields: goal, raised amount, progress, deadline/status and action.

PERFORMANCE

Compress large images, use modern formats, lazy-load media and avoid unnecessary scripts.

MEDIA

Replace the visibly broken/missing campaign image or provide a designed fallback state.

Task 3 — Features, Campaigns & Impact

Evidence from the supplied feature/campaign screenshot

Figure 14.2: Feature showcase, campaigns, impact, and testimonial sections.

Task 4 — NGO Website Feature Highlight

Figma-oriented planning for a stronger NGO digital experience

Donation

Secure CTA, campaign-specific options, confirmation and use-of-funds information.

Volunteer

Simple form with interests, availability and preferred volunteering area.

Impact

Lives impacted, volunteers, campaigns and supporting reports.

Campaigns

Goal, raised amount, progress, status, deadline and clear action.

Testimonials

Supporter/volunteer stories with context and consent.

Events & Updates

Drives, workshops, stories, announcements and outcomes.

Contact

Inquiry form, location/social links and response expectations.

Proposed NGO User Journey

A focused path from mission understanding to action

Primary conversion paths: DONATE and VOLUNTEER

Technologies & Tools Used

The work emphasized AI-assisted design and no-code/low-code workflows

AI Tools

Ideation, wording, taglines, content refinement and layout suggestions.

AI Website Builder

Wix / WordPress / Google Sites or another suitable AI-assisted builder.

Figma / Similar

Wireframes, feature layouts, UI cards and visual presentation.

Screenshot & Annotation

Documenting observations and marking improvement areas.

Web Browser

Previewing layouts, navigation, responsiveness and presentation.

Design Principles

Hierarchy, spacing, consistency, accessibility, responsiveness and clear CTAs.

Design & Development Methodology

A repeatable process used across the internship tasks

Challenges & Solutions

Practical issues encountered during design and analysis

CHALLENGE

Professional content

Use AI for first drafts, then edit for accuracy, concise language and professional tone.

CHALLENGE

Generic AI design

Customize colors, wording, imagery, section order and feature priorities.

CHALLENGE

NGO trust

Provide transparent impact information, campaign status, reports and contextual testimonials.

CHALLENGE

Accessibility

Add alt text, focus states, adequate contrast, meaningful links and accessible forms.

CHALLENGE

Page structure

Start from visitor goals and use a small number of clearly defined sections.

CHALLENGE

Broken media

Replace the asset or add a fallback state; test image paths before publication.

CHALLENGE

Mobile usability

Use responsive layouts, stacked cards and touch-friendly controls.

CHALLENGE

Information overload

Use concise cards, headings, progressive disclosure and clear CTAs.

Learning Outcomes

Technical, design and professional growth

TECHNICAL & DESIGN

- AI-assisted website creation
- Information architecture
- Page hierarchy
- UI/UX analysis
- Responsive layout planning
- Accessibility awareness
- Figma feature visualization

PROFESSIONAL

- Concise website writing
- Visitor/donor/volunteer perspective
- Actionable recommendations
- Screenshot-based documentation
- AI productivity with human review

IMPACT

The task series bridges the gap between simply creating a webpage and designing a useful digital experience.

A professional website must combine visual appeal, useful content, clear actions, accessibility, responsiveness and trust.

Overall Outcome

How the three tasks connect

TASK 2

Professional personal profile website structure with AI-improved content and presentation plan.

TASK 3

Screenshot-based website audit with prioritized UI/UX, content, accessibility, trust and performance improvements.

TASK 4

NGO feature showcase covering donation, volunteer, campaigns, impact, testimonials, events, stories and contact.

Supporting Evidence — CTA & Footer

Supplied screenshot from the internship report

Figure 14.3: Final "Be a Part of the Change" CTA and footer.

Evidence Note

The screenshots in this report were supplied as task evidence. No unsupported organizational statistics or claims have been added to the analysis. Where recommendations refer to impact reports, campaign information, or donor details, these are proposed improvements rather than verified facts about the organization.

CONCLUSION

The internship provided practical exposure to modern website design workflows using AI and no-code tools.

Key takeaways

AI can accelerate content and design ideation — but human review remains essential for accuracy, usability, accessibility, organizational context and final quality.

Thank You

Ashutosh Ray • B.Tech CSE • IILM University, Greater Noida
